

Wireless Internet Usage in Taiwan

Summary Report of October 2015 Survey

Taiwan Network Information Center

目 錄

1. Survey Methodology	1
2. Mobile Internet Usage Overview-Telephone Interview	2
(1) Mobile Internet usage.....	2
(a) Percentages of internet users who have used mobile Internet in the last six months....	2
(b) Percentages of internet users who have ever used Mobile Internet	3
(2) Mobile Internet Accessing	4
(a) Devices owned for mobile Internet access	4
(b) Devices used to access mobile Internet.....	5
(c) Mobile Internet access.....	6
(3) 4G Upgrade	7
(a) Intention to upgrade to 4G	7
(b) Reasons for not considering 4G upgrade	8
(c) Intention to upgrade to 4G in the next 12 months.....	9
(4) Mobile Internet usage.....	10
(a) Average time of mobile Internet access.....	10
(b) Monthly expense for mobile Internet access.....	11
(c) All-You-Can-Eat Plan Usage.....	12
(d) Mobile Internet Payment Method	13
(e) Mobile Internet activities	14
(f) Reasons for using mobile Internet	15
(g) User satisfaction with mobile Internet quality	16
(h) Reasons for unsatisfaction with mobile Internet quality.....	17
(i) Website Accessing.....	18
(5) Mobile Internet Application Usage	19
(a) Mobile payment.....	19
(b) Reasons for Using Mobile Payment.....	20
(c) Wearable Devices	21
(d) Reasons for Using Wearable Devices	22
(e) Live Streaming Platform Usage	23
(f) Live Streaming Platforms by Category	24
(g) Reasons for Not Using Live Streaming Platforms.....	25
(6) Attitude and Perception toward Mobile Internet.....	26

(a) Improvement of Daily Life via Mobile Internet.....	26
(b) Mobile Internet Helps One to Expand Social Circle.....	27
(c) Mobile Internet Helps One Increase Knowledge	28
(d) Worry about Mobile Internet Security	29
(e) Worry over Privacy Protection	30
3. Wireless LAN Usage	31
(1) Respondents who have used Wireless LAN in the last six months	31
(2) Percentage of respondents who have ever used Wireless LAN	32
(3) Wireless LAN User Behavior	33
(a) Devices used to access Wireless LAN	33
(b) Locations to Access Wireless LAN.....	34
(c) Average Usage of Wireless LAN.....	35
(d) Monthly expense on wireless LAN.....	36
(e) Wireless LAN Activities.....	37
(f) Reasons for Using Wireless LAN.....	38
(g) User satisfaction with wireless LAN	39
(g) Reasons for Unsatisfaction with Wireless LAN Quality	40
4. APPs.....	41
(a) Percentages of Respondents Using APPs.....	41
(b) Number of APPs Owned	42
(c) Most frequently Used Apps by type.....	43
(d) Percentage of Respondents who own paid APPs	44
(e) Highest APP Price Ever Paid.....	45
5. Reasons for not using mobile Internet/Wireless LAN	46
(1) Reasons for not using mobile Internet	46
(2) Reasons for not using Wireless LAN	47

1. Survey Methodology

Survey Period	Telephone interview survey: From Oct. 6, 2015 to Oct.15, 2015
Number of Samples	1,068 valid samples (telephone interview survey)
Target	Residents in Taiwan aged 12 and above
Population	21,006,360 residents in 22 cities/counties in Taiwan *Demographic information based on 2015 September Monthly Demographic Statistics Report, Ministry of Interior
Survey Method	Computer-assisted telephone interview
Sampling Method	A stratified simple random sampling was used to separate the population elements into strata composed of 22 cities/counties in Taiwan. The sample size of each stratum was determined using proportional allocation method.

2. Mobile Internet Usage Overview-Telephone Interview

(1) Mobile Internet usage

(a) Percentages of internet users who have used mobile Internet in the last six months

79.8% of the 857 Internet user have used mobile Internet in the last six months.

Percentage of internet users who have used mobile Internet in the last six months

【Unit: %】

(b) Percentages of internet users who have ever used Mobile Internet

81.4 percent of 857 Internet users have ever used mobile Internet .

Percentage of internet users who have ever used mobile Internet

【Unit: %】

(2) Mobile Internet Accessing

(a) Devices owned for mobile Internet access

Smartphone is the main device owned owned by 725 mobile internet users for mobile Internet access , followed by “Tablet PC.”.

Devices owned for mobile Internet access

【Unit: %】

【Note : More than one answer is allowed; total percentage may be greater than 100%】

(b) Devices used to access mobile Internet

Smartphone is the main device used by 725 mobile internet users for mobile Internet access, followed by “Tablet PC.”

Devices used to access mobile Internet

【Unit: %】

(c) Mobile Internet access

4G has become the main method used by 725 mobile internet users to access mobile Internet.

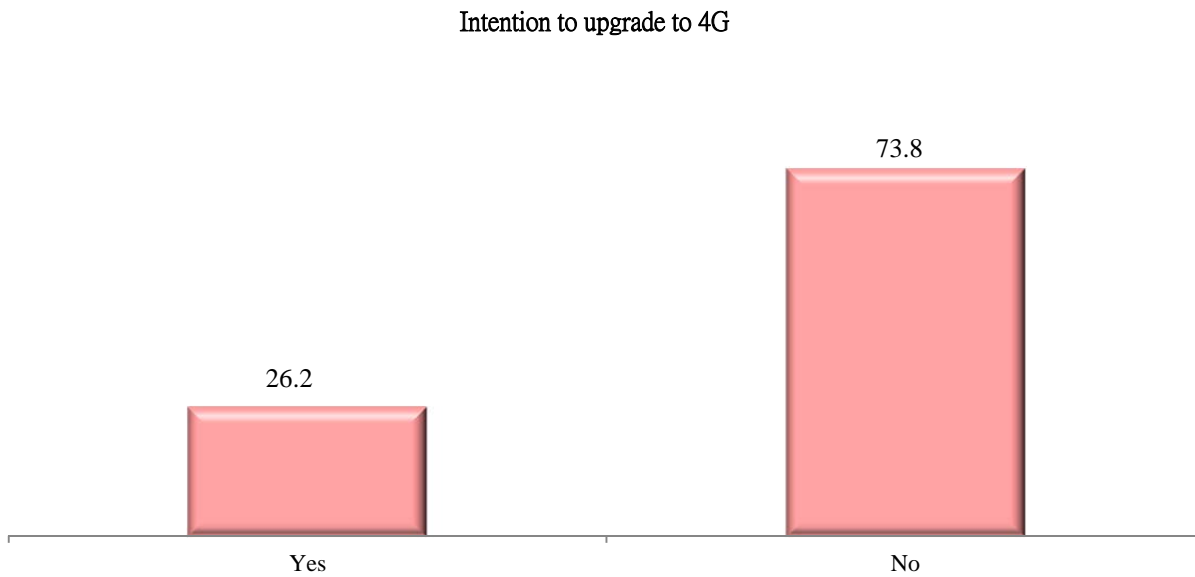

【Unit: %】

(3) 4G Upgrade

(a) Intention to upgrade to 4G

Among the 330 mobile Internet users not using 4G, 73.8% do not consider 4G upgrade.

【Unit: %】

(b) Reasons for not considering 4G upgrade

“Unnecessary” is the main reason of those 244 mobile internet users not considering 4G upgrade, followed by “low signal coverage” and “too expensive.”

Reasons for not considering 4G upgrade

【Unit: %】

(c) Intention to upgrade to 4G in the next 12 months

Among 244 mobile internet users who currently do not consider upgrading to 4G, 21.4% will consider the upgrade in the next 12 months.

【Unit: %】

(4) Mobile Internet usage

(a) Average time of mobile Internet access

The average time interval of 725 mobile internet users accessing mobile Internet is between 1 and 2 hours, followed by between 2 and 3 hours and between 30 minutes to 1 hour .

Average time of mobile Internet access per day

【Unit: %】

(b) Monthly expense for mobile Internet access

The average monthly mobile expense of 725 mobile internet users accessing mobile Internet is between NTD 501 and NTD 650 inclusive , followed by NTD 251 and NTD 400 inclusive and between NTD 651 and NTD 700 inclusive.

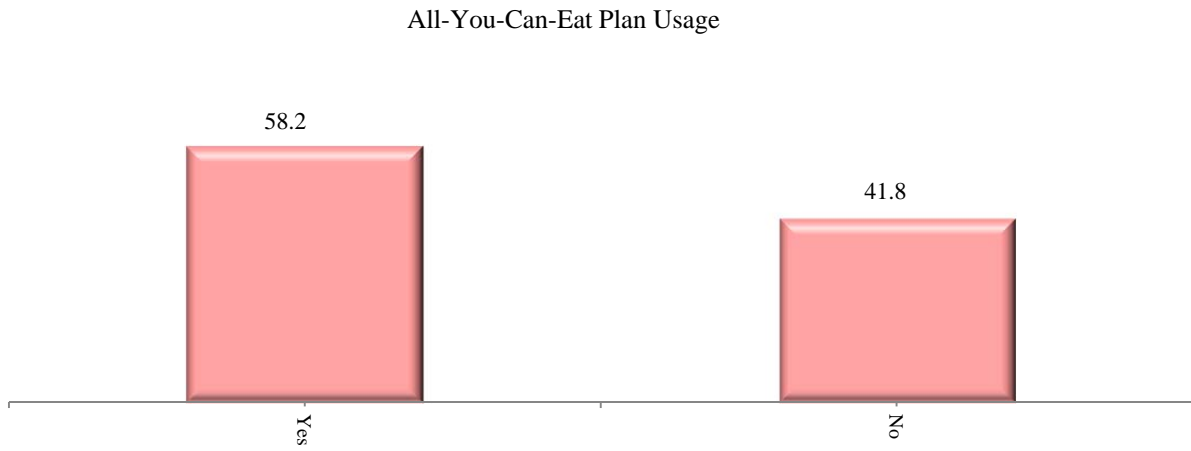

Monthly fee for mobile Internet access

【Unit: %】

(c) All-You-Can-Eat Plan Usage

58.2% of 725 mobile Internet users subscribe to “all-you-can-eat” service plan.

【Unit: %】

(d) Mobile Internet Payment Method

“Pay Monthly” is the main payment method used by 725 mobile internet users, followed by “Prepaid” method.

【Unit: %】

(e) Mobile Internet activities

“Instant Messaging,” “Social Media” and “Visit Webpages” are the three major activities preferred by 725 mobile Internet users.

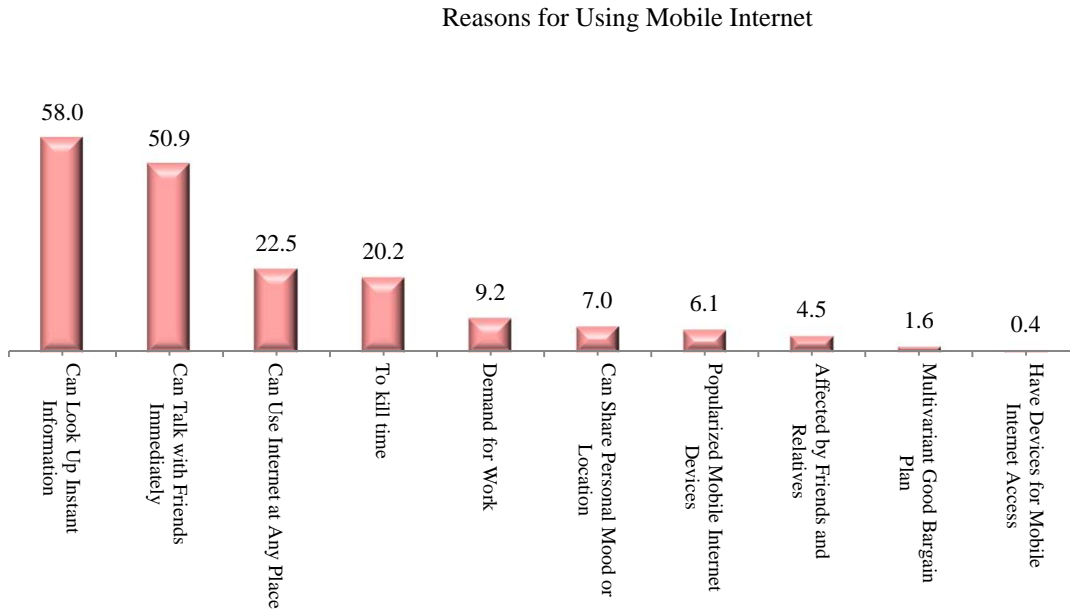

【Unit: %】

【Note : multiple choices are allowed; total percentage may be greater than 100% ; Only the top 10 answers are listed here】

(f) Reasons for using mobile Internet

“Look Up Information”, “Talk with Friends” and “Ubiquitous Access” are the three major reasons why 725 mobile internet users use mobile Internet.

【Unit: %】

【Note : Multiple choices are allowed; total percentage may be greater than 100% ; Only the top 10 answers are listed here】

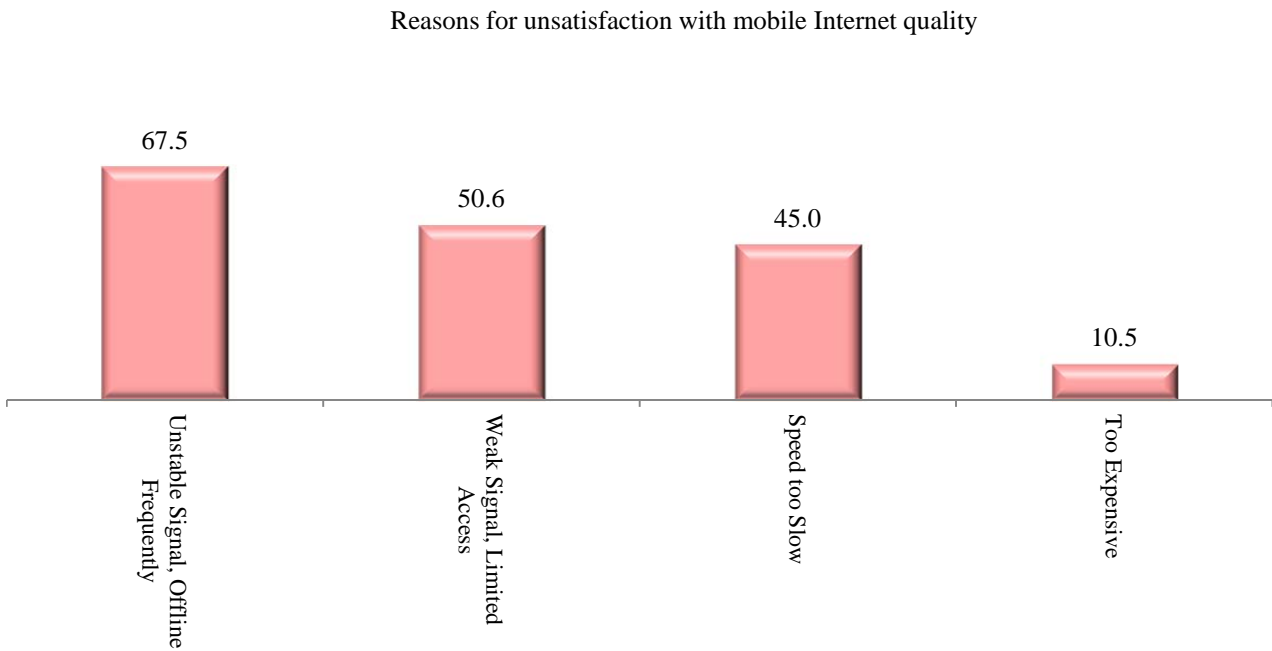

(g) User satisfaction with mobile Internet quality

78.0% of 725 mobile Internet users are satisfied with the quality of mobile Internet quality.

(h) Reasons for dissatisfaction with mobile Internet quality

The main reason for those 157 mobile internet users who are unsatisfied with mobile Internet quality is “Unstable Signal, disconnected frequently”, followed by “Weak Signal, Limited Access “.

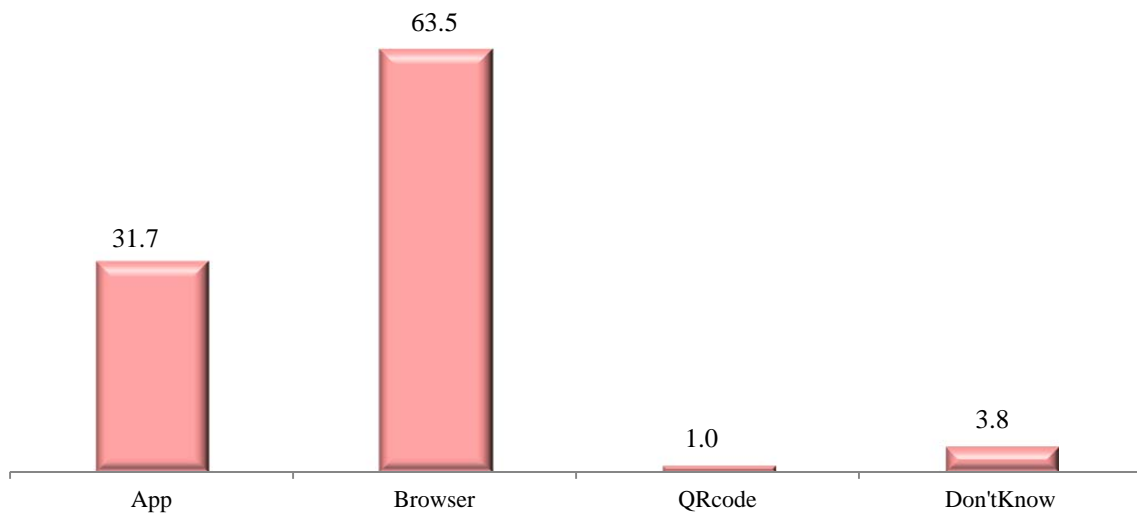

【Unit: %】

【Note : Multiple choices, total percentage may be greater than 100%】

(i) Website Accessing

“Browser” is the main method used by 725 mobile Internet users to access Wbsites, followed by using “App”.

Different Ways of Accessing Website

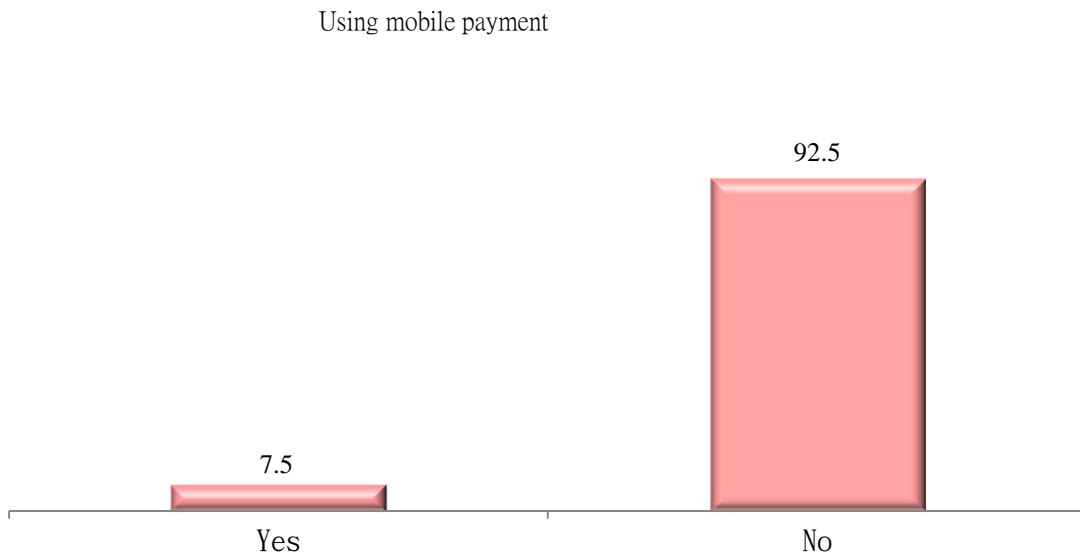

【Unit: %】

(5) Mobile Internet Application Usage

(a) Mobile payment

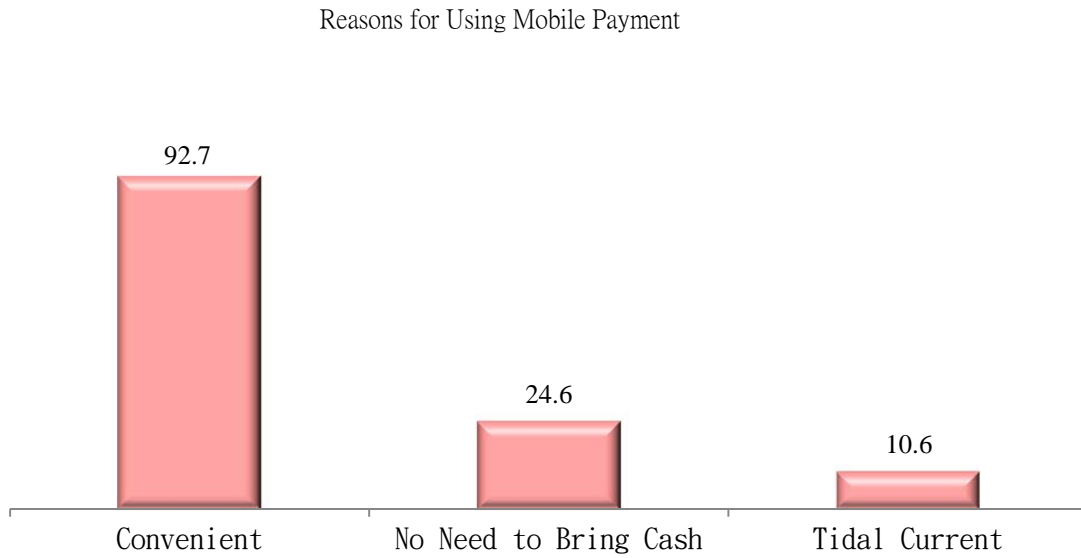

7.5% of the 725 mobile Internet users have used mobile payment, while 92.5% haven't.

【Unit: %】

(b) Reasons for Using Mobile Payment

“Convenience” is the main reason why those 54 mobile payment users use mobile payment, followed by “No Need to Bring Cash”.

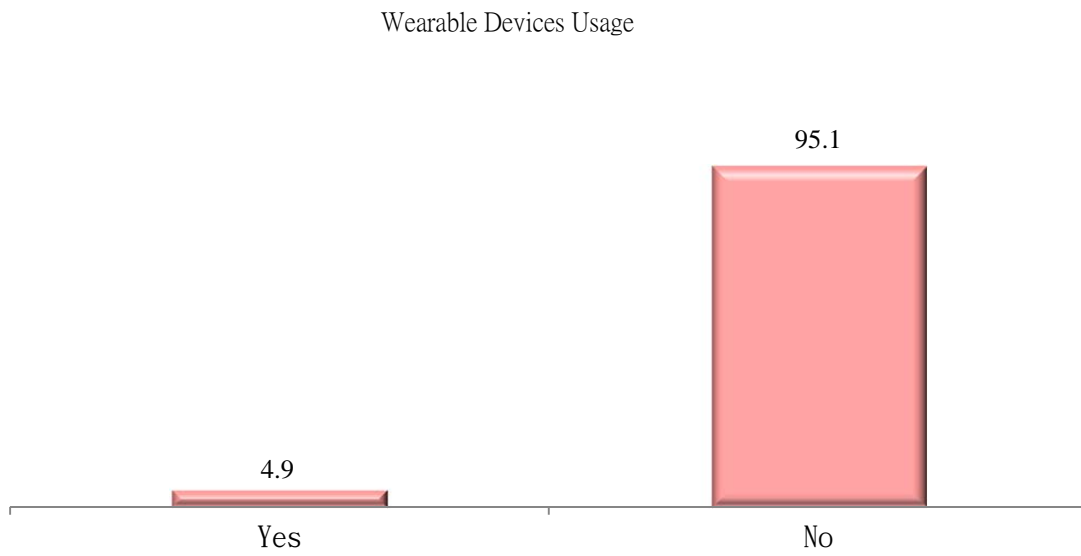

【Unit: %】

【Note : More than one answer is allowed, total might be greater than 100%】

(c) Wearable Devices

4.9% of the 725 mobile Internet users are using wearable devices , while 95.1% are not .

【Unit: %】

(d) Reasons for Using Wearable Devices

“Suitable for Sport” is the main reason why those 35 Wearable Device users use wearable devices., followed by “Convenient”.

Reasons for Using Wearable Devices

【Unit: %】

【Note : Multiple choices, total percentage may be greater than 100%】

(e) Live Streaming Platform Usage

12.1% of those 725 mobile Internet users are using live streaming platforms, while 87.9% are not.

Live Streaming Platform Usage

【Unit: %】

(f) Live Streaming Platforms by Category

By category, “Entertainment” is the main live streaming platform category used by those 87 live streaming platform users , followed by “News”.

Live streaming platforms by category

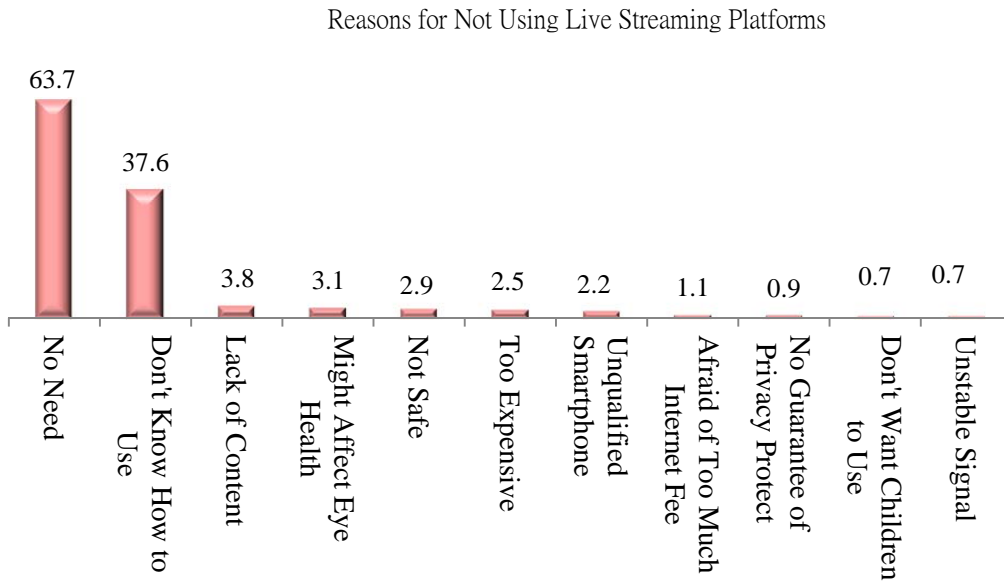

【Unit: %】

【Note : More than one answer is allowed, total might be greater than 100%】

(g) Reasons for Not Using Live Streaming Platforms

“No need” is the main reason why those 637 mobile internet users do not use live streaming platform, followed by “Don’t know how to use”

【Unit: %】

【Note : More than one answer is allowed, total might be greater than 100%】

(6) Attitude and Perception toward Mobile Internet

(a) Improvement of Daily Life via Mobile Internet

79.4% of the 725 mobile Internet users feel that using mobile Internet improves their daily life while 19.8% don't.

【Unit: %】

(b) Mobile Internet Helps One to Expand Social Circle

76.0% of the 725 mobile Internet users feel that using mobile Internet helps them to expand social circle, while 23.6% don't.

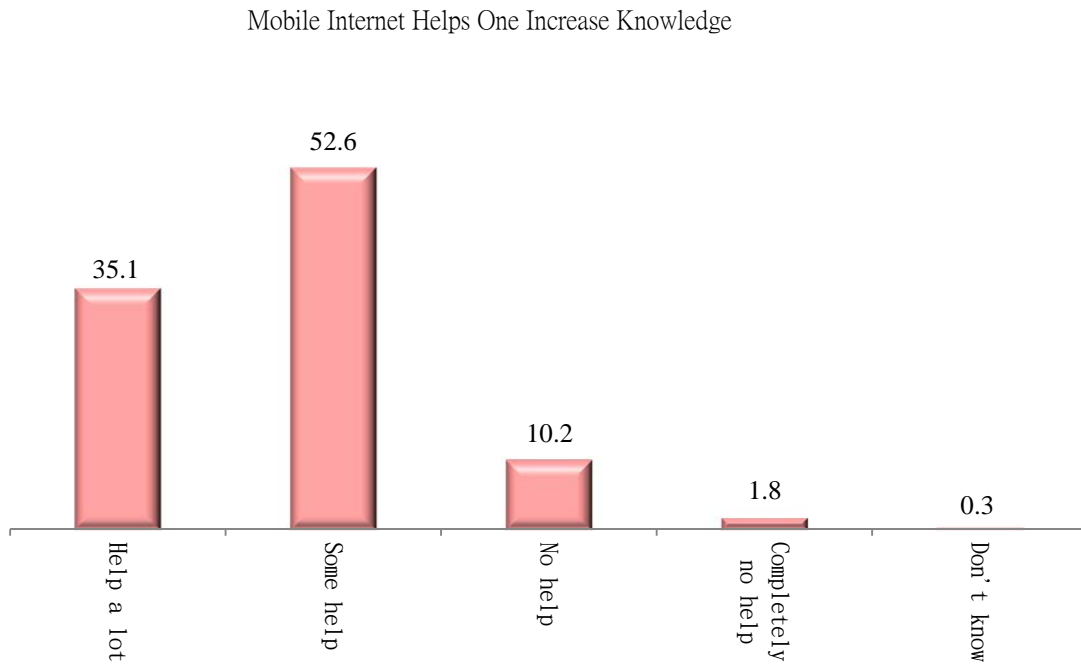

Mobile Internet Helps One to Expand Social Circle

【Unit: %】

(c) Mobile Internet Helps One Increase Knowledge

87.7% of the 725 mobile Internet users feel that using mobile Internet helps increase knowledge, while 12.0% don't.

【Unit: %】

(d) Worry about Mobile Internet Security

64.6% of the 725 mobile Internet users worry about mobile Internet security when using mobile Internet, while 33.5% don't.

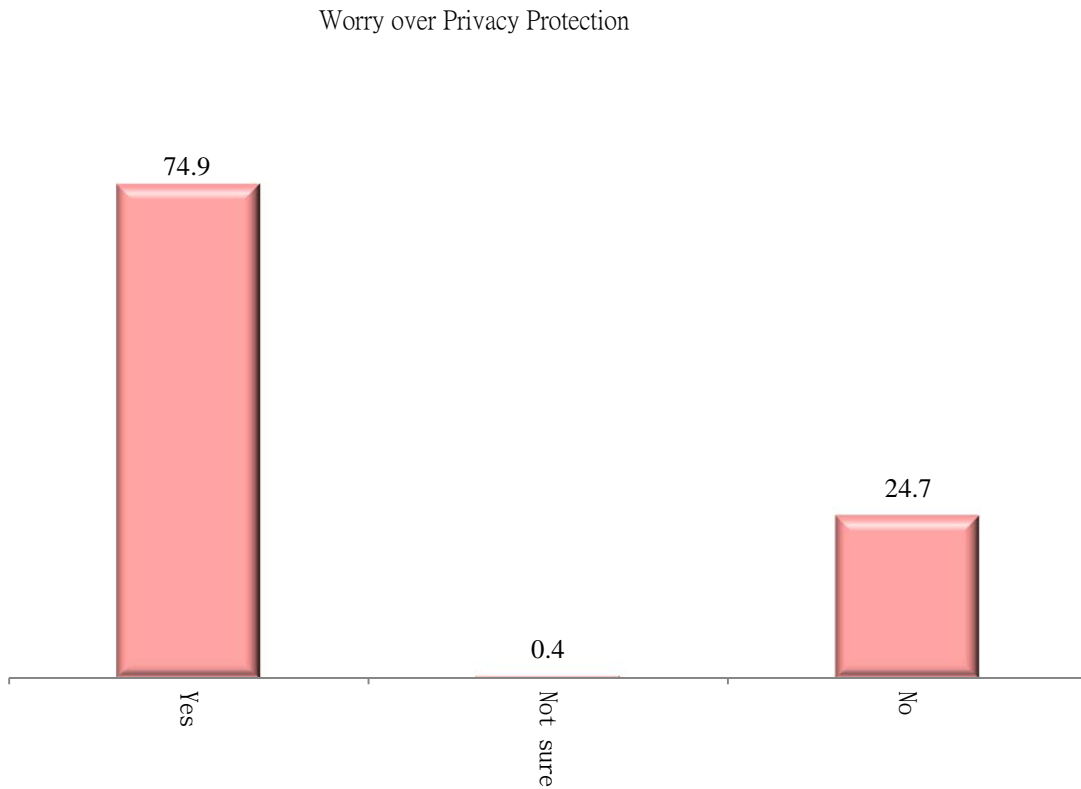

Worry about Mobile Internet Security

【Unit: %】

(e) Worry over Privacy Protection

74.9% of the 725 mobile Internet users worry about privacy protection when using mobile Internet, while 24.7% don't.

【Unit: %】

3. Wireless LAN Usage

(1) Respondents who have used Wireless LAN in the last six months

56.3% of the 891 Internet users have used wireless LAN in the last six months, while 43.7% haven't.

【Unit: %】

(2) Percentage of respondents who have ever used Wireless LAN

73.2 % of the 891 Internet users have ever used Wireless LAN, while 26.8% have never used.

Percentage of respondents who have ever used Wireless LAN

【Unit: %】

(3) Wireless LAN User Behavior

(a) Devices used to access Wireless LAN

“Smart phones” is the major device used by those 652 Wireless LAN users to access Wireless LAN, followed by “Tablet PC” and “Notebook”.

【Unit: %】

【Note : Multiple choices, total percentage may be greater than 100%】

(b) Locations to Access Wireless LAN

“MRT station, Airport or Train station” is the major location where those 652 accessing Wireless LAN users access Wireless LAN, followed by “Convenience stores” and “Work places.”.

【Unit: %】

【Note : Multiple choices, total percentage may be greater than 100%】

(c) Average Usage of Wireless LAN

The main average time interval of 652 wireless LAN users accessing Internet is half hour or more but less than 1 hour, followed by “1 hour or more but less than 2 hour ” and “20 minutes or more but less than 30 minutes”.

Average access time interval for Wireless LAN

【Unit: %】

(d) Monthly expense on wireless LAN

81.4% of 652 wireless LAN users use “free” Wireless LAN, while 18.6% pay for it..

Monthly expenditure on Wireless LAN

【Unit: %】

(e) Wireless LAN Activities

“Visit Webpages”, “Access Social Media” and “Instant Messaging” and are the three major activities preferred by 652 Wireless LAN users.

Wireless Lan Activities

【Unit: %】

【Note : More than one answer is allowed, total might be greater than 100% ; Only list the top 10items】

(f) Reasons for Using Wireless LAN

“Free of Charge”, “Can Look Up Instant Information” and “Can Use Internet at Places with WiFi” are the three major activities why the 652 Wireless Lan users use Wireless Lan.

【Unit: %】

【Note : Multiple choices, total percentage may be greater than 100% ; Only the top 10 answers are listed here】

(g) User satisfaction with wireless LAN

77.6 percent of the 652 wireless LAN users are satisfied with the quality of wireless LAN connection, while 21.8% are dissatisfied .

Satisfaction with wireless LAN quality

【Unit: %】

(g) Reasons for Unsatisfaction with Wireless LAN Quality

“Too Slow” is The main reason why those 157 Wireless LAN users are unsatisfied with wireless Internet quality, followed by “Unstable Signal, Easy Disconnection”.

Reasons for Not Satisfied with Wireless LAN Quality

【Unit: %】

【Note : More than one answer is allowed, total might be greater than 100%】

4. APPs

(a) Percentages of Respondents Using APPs

85.6 % of the 891 mobile or wireless LAN Internet users have used APPs, while 14.6% haven't.

Percentage of respondents using APPs

【Unit: %】

(b) Number of APPs Owned

“1-10” APPs is the main category that the 762 APP users own APPs, followed by “11-20” and “21-30”.

【Unit: %】

(c) Most frequently Used Apps by type

Social Media APPs is main type of APPs used by 762 App users, followed by “Game”.

Most Frequently Used Apps by Type

【Unit: %】

【Note : More than one answer is allowed, total might be greater than 100%】

(d) Percentage of Respondents who own paid APPs

93.7% of the 762 APP users use free APPs, while 6.5% use paid APPs.

Percentage of respondents downloading paid APPs

【Unit: %】

(e) Highest APP Price Ever Paid

“USD 3.00~3.99” (13.9%) is the highest price category of those 48 App users who ever paid for APPs, followed by “USD 4.00~4.99”(13.3%).

Highest Fees willing to pay for APPs

【Unit: %】

5. Reasons for not using mobile Internet/Wireless LAN

(1) Reasons for not using mobile Internet

“Unnecessary” is the major reason why those 166 respondents who don’t use mobile Internet, followed by “Too expensive” and “Access the Internet with other ways”.

【Unit: %】

【Note : More than one answer is allowed, total might be greater than 100%】

(2) Reasons for not using Wireless LAN

“Seldom access the Internet from outside of home” is the major reason why those 239 respondents who don’t use Wireless LAN do not use Wireless LAN, followed by “The coverage isn’t good enough ” and “Unnecessary”.

Reasons for not using Wireless LAN

【Unit: %】

【Note : More than one answer is allowed, total might be greater than 100%】
